Subj: PESTICIDE DISPOSAL SITE, AREA G, NWIRP MCGREGOR, TX

Dear Mr. Highland:

As discussed in my 14 September 1984 letter to Mr. Samuel L. Nott remedial action efforts were initiated at the subject site in July 1984. Subsequent analyses of samples taken at the site after initial excavation efforts showed that highly contaminated soils still remained. An investigation (Confirmation Study) was therefore initiated in February 1985 to define the extent of contamination at the site and to evaluate several alternatives for remedial action. This report was finalized in July 1985 and is enclosed as Attachment 1 for your information. The study was reviewed by the Texas Department of Water Resources (TDWR) and approval was given to prepare detailed plans and specifications for the remedial action alternative recommended. This approval was given by way of letter from Mr. Bryan W. Dixon, Chief TDWR Solid Waste and Spill Response Section to Mr. Larry B. Feldcamp, Baker & Botts (Attachment 2).

We are proceeding with the development of final closure specifications under TDWR supervision and will forward you a copy of the final plans and specifications upon completion.

Should you have any questions or comments, please contact Mr. A. L. Chestnut at (803) 743-5510.

Sincerely,

D. R. SPELL, P.E.
Head, Environmental Branch
